

THE PHOTOGRAPHER'S POLICIES

Dennis King of “*D. King of Images*” will only book one wedding per day and is the only photographer. This will assure you that you get the artistic quality I am know for as well as the style you expect.

I use only Nikon professional equipment to photograph your wedding ceremony to assure you get the best image quality.

All images are loaded into my computer and then I as the artist will be responsible for enhancing the wedding prints

The best professional photo lab in my opinion is used to print your order to assure consistent density and color control throughout your order.

Anyone photographing with digital, SLR's or Professional equipment will be asked not to photograph during my formal group sessions. Relatives with point and shoots will be allowed as long as they don't photograph when I do so we avoid blinking eyes or impede my photographing all the poses I will be taking for you with the time allowed

“*D. King of Images*” retains all copyright protection privileges under current **Federal Copyright Laws.**

Thank You

Dennis King of “*D. King of Images*”
